

CRE

CAMBRIDGE ROAD ESTATE

REGENERATION

Option C

(No.10 of options considered)

What will change

- All homes would be replaced with new homes
- All of the estate and its layout could be redesigned

What the changes will achieve

| |
|---|
| Re-provide the same number of council homes |
| Provide 100 new low cost home ownership homes |
| Build 1148 additional homes |
| Total of 1980 homes |

- All residents would move home
- All new homes would be larger than the current homes and meet the London Housing Design Guide standards
- The best opportunities to create a safer and more secure environment through a complete redesign of the estate and its layout
- The widest improvements to outdoor recreation and green spaces
- New and improved community facilities

The council is looking at regeneration as the best way to provide the high quality homes we need.

Have your say.
